

Bucher Municipal division profile

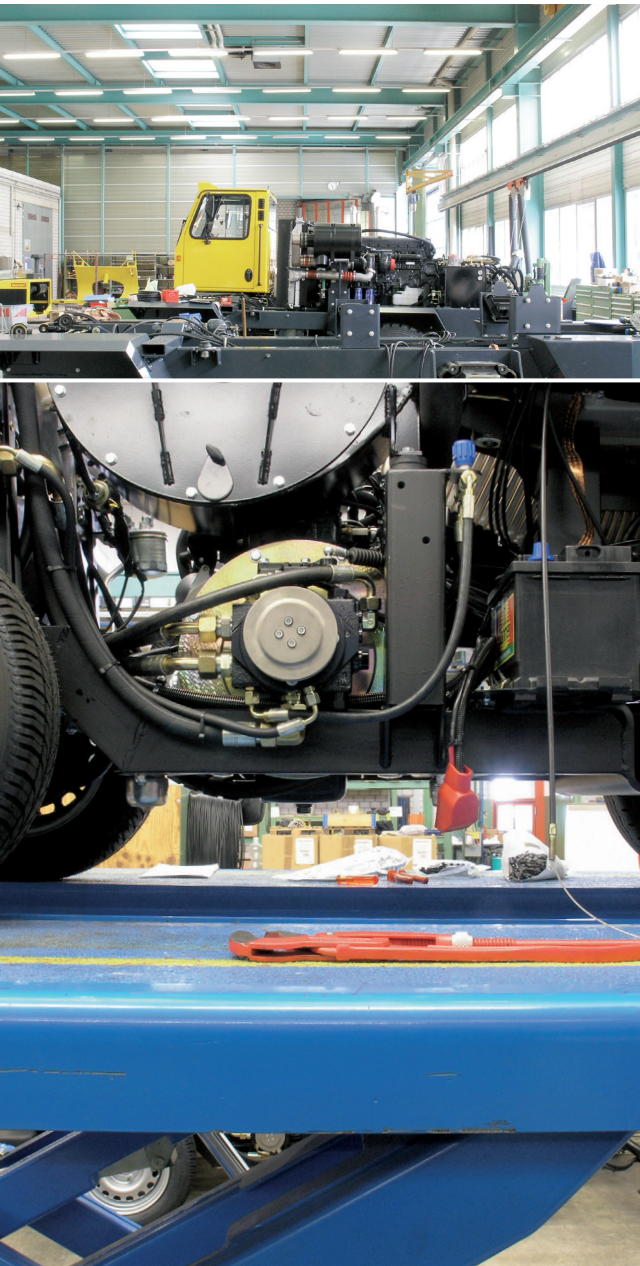

## Safe and clean roads

Bucher Municipal is a world leading supplier of municipal vehicles for cleaning and removing snow from public and private areas. Its range of products encompasses compact and truck mounted sweepers, winter maintenance equipment and refuse collection vehicles. All our vehicles come with cutting edge technology providing superior performance, ease of operation, and operational efficiency. In 2010, Bucher Municipal generated CHF 375 million in sales with some 1 300 employees.

**Compact sweepers** Less than 1 metre wide, our sub-compact sweepers are ideal for navigating the most confined spaces. Conventional, articulated or four-wheel steering makes our compact sweepers exceptionally manoeuvrable. This agility, coupled with the superior sweeping power of the front brushes, ensures efficient, effective and precise cleaning in town centres, through pedestrian precincts, at bus stops, along the narrowest alleyways or in recreation areas. Outstanding suction performance, directional stability and durable aluminium or stainless steel components give you a machine that is not only built to last, but also protects the environment from dust and noise.

**Truck mounted sweepers** Recognised as the world standard for this class of cleaning vehicle, the wide range of truck mounted sweepers delivers extremely strong suction and cleaning performance. Their robust construction using high quality materials ensures a long service life and maximum operational efficiency, cost effectiveness and uptime. Especially easy to operate and maintain, they are ideal for daily use. And low noise levels are just another feature that makes them particularly suited to urban cleaning.

**Spreaders** Ideal for dry or liquid material, our spreaders are designed for servicing small to large road networks, from village streets to trunk roads and motorways, and for use at airports. A wide range of attachments and accessories allows them to perform in all weather conditions. Standard and optional electronic components, such as GPS tracking, make them even easier to operate in professional applications.

**Certified quality** Bucher Municipal's competence centres are naturally ISO 9001:2000 certified, manufacturing vehicles that meet the high expectations of our customers across the globe.
