

Best helper for your sewer cleaner unit

Designed for difficult flushing tasks located in fields, narrow passages or across stairs. The tracked under-carriage with adjustable width provides stable and safe manoeuvring in demanding terrain, while the intuitive control panel makes it easy for one person to control the system. With integrated hose guide, LED work light and practical tool storage, the Bucher Remote Reel is the perfect partner for effective and safe remote jetting – both day and night.

All terrain jetting

Light, small, and manoeuvrable

Bucher Remote Reel

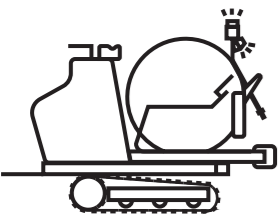

Ideal companion to sewer cleaning vehicles. Access difficult tasks and increase your productivity.

Tracked remote jetting hose reel

Easy access to all types of terrain where sewer cleaning vehicles cannot reach.

The Bucher Remote Reel is a motor-driven jetting hose reel that acts as an effective extension of your sewer cleaner unit. The operator can easily and safely control the system alone thanks to its tracked undercarriage that can be driven through difficult to reach environments. By bringing the Bucher Remote Reel to where your sewer cleaning unit cannot reach, you extend the range and functionality of your unit and therefore increase your productivity.

Strong service support

At Bucher Municipal, we take our commitment to keeping your vehicles on the road seriously.

Our industry-leading service network, supported by over 70 factory-trained engineers, has a market leading first time fix rate and it ensures that expert assistance is always within reach.

With six strategically located service centres across the UK, a global parts centre offering next-day delivery, and a comprehensive range of Repair & Maintenance packages, we provide seamless support to keep your fleet running efficiently with less down time and reduced maintenance costs.

We use only Original Equipment Manufacturer (OEM) parts for all maintenance, repairs, and routine servicing, guaranteeing optimal performance and reliability. As the OEM and industry experts, we are uniquely positioned to support your vehicles with an extensive £7M+ stock of original parts, ensuring unmatched availability and quality.

Easy access to jetting tasks

Compact and motorized jetting reel with adjustable belt undercarriage to reach where a vacuum cleaner cannot.

Tiltable jetting reel

Hydraulic jetting reel with a 200 m 1" plastic hose. Adjustable speed from 0-4 km/h.

Control panel

Practical and intuitive control panel for easy control of all Bucher Remote Reel functions in the field.

Support legs

Two extendible steel legs can be fixed into place to safely support the jetting reel when tilted.

Hose guide

Hydraulic jetting reel with manual hose guide and free run function. Easily roll the jetting hose in and out.

Cover hook holder

Take your cover hooks with you on the go. Keep them stored and ready for use in the practical holder.

Tool tray

Spacious and sturdy steel tool tray with drain holes, mounted in front of the control panel for easy access.

Work light and beacon light

Keep yourself and your work area well lit and safe, even in the dark, with the strong work light and rotating beacon.

Designed to perform. Built to last.

Bucher's sewer and drainage equipment is built to last — and it shows in the consistently strong residual values our machines keep, often exceeding 50% at trade-in, even after years of use.

Thanks to an exceptional build quality, our superstructures tend to outlive their chassis, making remounting a smart, reliable, and cost-effective option for fleet owners.

This not only supports a robust pre-owned market but also provides added value for customers looking to finance new equipment by trading in their existing units.

Even after years of use, our equipment continues to perform reliably, offering consistent returns both in operation and at resale, lowering the total cost of ownership.

Whether you're upgrading, expanding, or optimizing your fleet, investing in Bucher means choosing long-term performance, financial flexibility, and maximum value retention.

Bucher's sewer and drainage equipment is designed to support your business today — and keep delivering value well into the future.
